Assembly line cooking, built-in organization, double ovens and sinks

“36% of boomer aged couples enjoy cooking together.”

# The multi-tasker

## Organizational and efficient

This kitchen’s American black walnut cabinetry is absolutely striking, but you’ll marvel at the space-saving solutions that have also been integrated. “When mom was the only one who used the kitchen, no one else needed to know where stuff was,” McCauley says. “Now everyone is coming and going and you need to have everything in its place.”

Kitchens

The island is also a popular and practical option for this family. “With three kids, the island makes it a lot easier for everyone to be in the kitchen at once,” says homeowner Gemma Chiarcos. “The accessibility of having different work stations is great.” Having multiple sinks and ovens facilitate a trend towards what McCauley calls “assembly line cooking” where family members can work in various areas of the kitchen at the same time.
